

What is FUNDANIQUEM?

FUNDANIQUEM is a non-profit, tax deductible charitable organization dedicated in providing life-changing medical care and support to underprivileged Honduran children and their families.

FUNDANIQUEM'S History

FUNDANIQUEM is destined to the assistance and prevention of Honduran children with severe burns. Our main mission is that no child who is a victim of burns dies for the lack of the medical attention they require.

FUNDANIQUEM is the result of the dreams of doctors and volunteers that have seen by first hand experience the pain that burns cause in a child and his or her family.

Burns are also an accident that is particularly cruel because it is extremely painful, but most of the times they leave scars and deformation for life.

In our country we have excellent doctors and hospitals, but they lack of the necessary resources for more complex units, new equipment medicines and access to a skin bank.

FUNDANIQUEM, even though it is a young foundation, we have accomplished extraordinary goals the offer of counting with a real hospital %Hospital Maria+. This hospital will start working around June 2009; meanwhile we are remodeling the Burn Unit in Materno Infantil Hospital, where Dr. Omar Mejia who is president of our foundation is also the Chief of the unit.

However we have a lot to achieve in order to give to the burn child the attention and care he or she deserves.

Our intention is that you are motivated and feel the need of solidarity and become a part of this noble cause that will help thousands of Honduran children.

FUNDANIQUEM'S Funding

The Foundation is supported through the donations of caring individuals, organizations, and by fundraisers sponsored by a support group.
